To the owner or user: This product manual is a source of information about the installation, start up, cleaning, maintenance and repair of the product. The IOD 16022 and IOD 22030 are ice only countertop dispensers designed to use 22 inch wide and 30 inch wide respectively Ice-O-Matic cubed ice machines as their source of ice. Ice from the cuber falls into the insulated bin where it is stored until needed. When the user pushes the dispense button, a rotating wheel scoops the ice up to the front of the bin where there is an outlet to the ice chute. Ice will dispense continually for as long as the push button or lever is depressed or until the bin is empty.
